TEN REASONS WHY YOU SHOULD BE THINKING ABOUT FIBRESPEED

EXPLOIT THE VERSATILITY OF VOIP (VOICE OVER IP)

Highly adaptable, feature-rich call systems that allow you to control costs whilst giving you the flexibility to handle rapidly changing business demands - and nowhere near as complicated as you might think!

eBUSINESS - YOUR GATEWAY TO THE WORLD

Stay close to your customers, partners and suppliers. Smart web-based applications for sales, marketing, information sharing, process integration and status reporting. How easy are you to do business with?

SOFTWARE ON-DEMAND

As Much As You Want, When You Want It, Where You Want It
Free yourself from the tyranny of specifying, buying, maintaining, licensing, backing-up and upgrading systems to support key business applications. On-demand software - always available, always on the latest release, always tuned to your needs.

EFFORTLESS FILE SHARING AND MEDIA STREAMING

Send and receive audio, hi-definition video and complex data files in the blink of an eye. Fed up waiting for your network to catch up with you? Wait no longer! Let fibre supercharge your productivity.

THE CLOUD - A QUANTUM LEAP IN IT SERVICE DELIVERY

Massively hyped, but with good reason. A huge range of facilities that combines highly flexible service management with close control cost. This cloud really does have a silver lining!

VPNS (VIRTUAL PRIVATE NETWORKS) AND MPLS NETWORKS SECURE, PROTECTED, CONVENIENT

Connect your sites and extend your network to remote and home workers with VPNs – convenient and secure communications wherever they're needed. Concerned about the quality of your video or audio services? No problem! MPLS will intelligently manage time sensitive communications.

DISASTER RECOVERY - IT MIGHT NEVER HAPPEN, BUT WHAT IF IT DOES?

Don't let the unthinkable sink your operation. Secure your data and protect your business. Off-site datacentres with back-up, platform mirroring and application sharing made easy.

ALERTING, MONITORING AND DETERRING; IP-CCTV SECURITY FOR BUSINESS

Flexible, scalable IP-based security systems that combine evidential quality, high definition video streaming, low-cost flexible monitoring and low maintenance, secure, reliable data storage. Prevention is better than cure!

INTELLIGENT OPTIONS FOR THE MOBILE WORKFORCE

Empower your staff, integrate your business processes and slash admin costs. Mobile data applications that enable flexible working maximise productivity and allow you to operate anytime from anywhere. Get agile - outmanoeuvre your competition!

SAVE PRECIOUS TIME AND CUT COSTS BY VIDEO-CONFERRING

Spending too much time travelling to and from meetings? Fed up with escalating travel costs? Need to be in two places at once? Video-conferencing might just be the smart answer.
